MOLD & ENGINEERING

Our growth tells the story. Our products back it up. Whether you require die cast dies, plastic injection molds, contract machining, die/mold repair or engineering services, trust Franchino Mold & Engineering to deliver precisely what your company needs every time.

### Engineering & Design

Franchino Mold's team of engineers has the experience necessary to complete even the most complex job. Our engineers have worked on thousands of products across dozens of industries.

With 70+ years of experience, we can draw on our vast product knowledge to complete your plastic injection mold, die cast die or machining project to your exact needs.

### Plastic Injection Molds

There's a reason customers choose Franchino Mold when looking for industry-leading plastic injection molds. With an average of more than 20 years of experience, our engineers and skilled machinists are prepared to meet any challenge in designing and building plastic injection molds.

### Die Cast Dies

By using the latest technology, expertise of die cast dies and extensive knowledge of machining techniques, Franchino Mold's highly skilled and trained workforce produces high-quality die cast dies that exceed expectations.

### Contract Machining

Die and mold machining has some of the most demanding requirements in the industry — put Franchino Mold's 70+ years of die and mold building experience to work for you with superior custom contract machining services.

### Die & Mold Repair

Broken dies and molds mean downtime for your company. Franchino Mold can get you up and running again with quality die and mold repair, including hotspotting when needed.

### On-site Repair

For large dies that can't easily be transported or for faster on-site repair of critical dies, Franchino Mold has a mobile repair unit able to come directly to your business for a quality repair completed quickly.
